SIDESTEIN MARKET, A HIGHLY-CUSTOMIZED SOLUTION

In the heart of the main New York University (NYU) campus, valuable space on the first floor of the Weinstein Residence Hall had been warehoused to provide a gourmet market for the NYU student body. NYU chose Aramark's POD brand as a starting point for their project. Re-named Sidestein Market, the venue is uniquely NYU.

GOALS:

- Create a retail venue with both a hot and cold food buffet and unique gourmet foods and snacks.
- Ensure completion by mid-August 2014 for students.

CHALLENGES:

- Construction could not begin until the means of egress from a dining facility below was complete.
- The existing waffle slab structural floor required engineered openings for drains and electrical wiring. Penetrations had to be carefully positioned and reinforced.

SOLUTIONS:

- Aramark Engineering and Asset Solutions was engaged to provide design build services to better coordinate the project from the design process through completion.
- Teamed up with an Aramark approved partners, Mancini-Duffy Architecture and Turner Construction. Due to their familiarity with Aramark, they were able to work in tandem with the project team.

RESULTS:

- 1,749 square foot market with unique New York flair.
- Project was completed on time for the Fall semester, 2014.
- Project was completed \$27k under budget. Total Project Cost was \$1,208,000.
