

ARAMARK ENGINEERING SOLUTIONS

TEAM MEETING – NOVEMBER 19-21, 2024

Aramark Engineering Solutions is a highly specialized team of 100 technical, multi-disciplined engineering experts **within the global Aramark Facilities organization**. For over **40 years** our technical professionals have provided cost-effective, tailored solutions to help our clients get the most out of their assets and environments at every phase. We have supported **thousands of projects** of the built environment for our national clients. These comprise technical only relationships as well as those where we have a broader facilities operations partners (**1.0 billion GSF**). Whether we are building new state-of-the-art-facilities, retro-commissioning old ones, or reducing water and energy consumption, our goal is to maximize every dollar and extend asset life cycles without sacrificing comfort and reliability.

Our team is comprised of **skilled engineers, architects, project managers** and **consultants** who are widely sought for their specialized experience and accomplishments. We are technically-oriented professionals who thrive on interaction within our client base in education, healthcare, business, manufacturing, sports and destinations industries.

MISSION

To deliver a consistent standard of excellence through insight-driven innovation. By combining our deep technical expertise and comprehensive capabilities along with collaboration from our technical partners we design custom client solutions wherever people, work, learn, recover, and play.
